Tier 1 Capital Growth

During the second quarter of 2025, Corporate America added \$38.5mm to Tier 1 Capital, ending June 2025 with \$335.8mm. This capital growth was driven by our 1% perpetual contributed capital (PCC) initiative that unlocks free service fees for our credit unions.

Net Economic Value (NEV)

The Corporate’s interest rate risk exposure is measured by using net economic value (NEV) and a NEV ratio. The primary risk measurement is the decline of net economic value in the up 300 basis point scenario. As of June 30th, we remain within regulatory limits as evidenced in the table to the right. Interest Rate Risk is monitored and reported to the board on a monthly basis.

Measurement	June 2025	March 2024	Policy/Regulation

AWAL Financial Assets	2.04	2.09	2.25

Liquidity

As of June 2025, total advised lines of credit to member credit unions were approximately \$3.7 billion. Combining cash held, tested sources of liquidity and liquid marketable securities, \$4.5 billion could be raised in a short period of time, if needed, to address a severe liquidity event.

Capital

As of June 2025, Corporate America Credit Union “CACU” continues to exceed minimum capital requirements. As of June 30th, our Tier 1 Capital Ratio is 7.03% and remains above the regulatory requirement of 4.00%. Both the Tier 1 Risk-Based Capital Ratio and Total Risk-Based Capital Ratio exceed the minimum requirements. This is primarily due to the higher concentration of government and agency holdings within the investment portfolio that carry a 0% to 20% risk weighting.

Asset Quality

Corporate America’s investment strategy is one of purchasing high quality permissible securities with senior cash flow structures to provide competitive returns. CACU conducts detailed due diligence in assessing credit risk in non-government guaranteed positions. At the end of June, 41.17% of the portfolio is government backed, 56% is rated AAA/AA +, 0.19% is rated AA/AA-, and 2.65% is rated <AA-.

Weighted Average Life (WAL)

Weighted Average Life (WAL) of Financial Assets measures the life of all assets including investments, loans, and cash. Adjusted Weighted Average Life (AWAL) is adjusted for a 50% slowdown in prepayments on investments. As of June 30th, we remain within policy/regulatory limit as shown in the table to the left.
